

## Objective:

Energetic and detail-oriented Computer Science graduate with a focus on full-stack development. Seeking to leverage solid skills in Java, JavaScript, Angular, Bootstrap, jQuery, HTML, CSS, and MySQL with a proficiency in **leveraging ChatGPT** to efficiently fix and speed up the development process to contribute effectively as a Java Full Stack Developer.

## Education:

- Bachelor of Science in Computer Science [2020] - [2023]

## Technical Skills:

- Programming Languages: Java, JavaScript, C, C++
- Web Technologies: HTML, CSS, Angular, Bootstrap, jQuery
- Frameworks/Libraries: Angular, Bootstrap, jQuery
- Databases: MySQL, MSSQL
- Tools: Visual studio code, IntelliJ IDEA, Eclipse
- Natural Language Processing (NLP) with ChatGPT: Skilled in using ChatGPT for fixing code, generating code snippets, and brainstorming framework ideas in full-stack development.

## Projects:

### 1. Food Ordering Application (C)

**Tech Stack:** C, GCC, Console UI

**Overview:** Built a text-based food ordering system where users can select hotel types, choose menu items, enter quantity, and get the final bill.

#### Key Points:

- Veg/Non-Veg hotel & menu selection
- Quantity-based billing with repeat order option
- Implemented using loops, arrays, and conditional logic

### 2. Juice Lab – E-Commerce Website

**Tech Stack:** HTML, CSS, JavaScript

**Overview:** Developed a responsive e-commerce website for a juice shop with product showcase and add-to-cart functionality.

#### Key Points:

- Multi-page navigation (Home, Products, About, Cart, Contact)
- Product cards with hover effects and quantity control
- Mobile-friendly layout with smooth UI animations

### 3. Pumo Technovation – Training Institute Website

**Tech Stack:** HTML, CSS, JavaScript, Bootstrap

**Overview:** Designed a multi-page website for a software training institute featuring course listings, events, and contact details.

**Key Points:**

- Sidebar-based course navigation system
- Responsive and clean Bootstrap layout
- Interactive UI elements with JavaScript

### 4. Zenith CRM – AI Powered Client Management System

**Tech Stack:** React, TypeScript, Tailwind CSS, Supabase, Recharts, Gemini AI

**Overview:** Created a modern CRM platform with dashboards, contact management, deal pipeline, task scheduling, and AI-based insights.

**Key Points:**

- Real-time data sync with Supabase
- Dashboard with analytics and charts
- AI-powered natural language query assistant

**Certifications:**

- Java Full Stack Developer [Pumo Technovation, Chennai], [2024]

**Additional Skills:**

- Strong problem-solving and analytical abilities
- Excellent communication and teamwork skills
- Ability to learn new technologies quickly and adapt to changing environments

**Languages:**

- English (Fluent)
- Tamil (Fluent)

**Declaration:** I hereby declare that the above-mentioned information is correct to the best of my knowledge and belief. I understand that any false statement may lead to disqualification from employment.
